

World Manufacturing Production

October 2024

Global manufacturing

Global index of manufacturing production

Global manufacturing has been gradually increasing in 2024, resulting in a modest

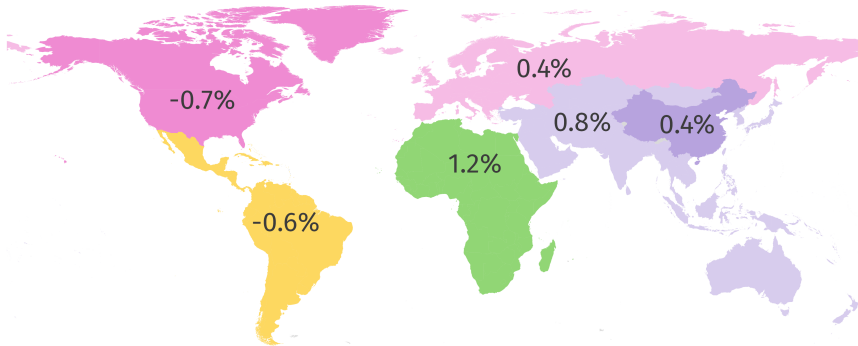

0.3%

growth for October 2024.

Regional performance

Month-over-month growth rate of manufacturing production by region

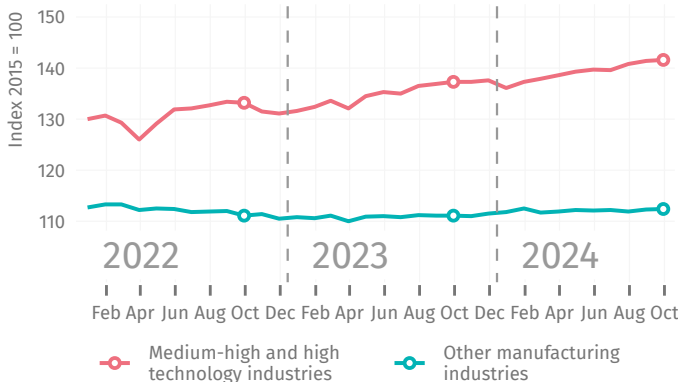

Northern America and **Latin America and the Caribbean** experienced a reduction in output in the current month, while other regions achieved moderate growth.

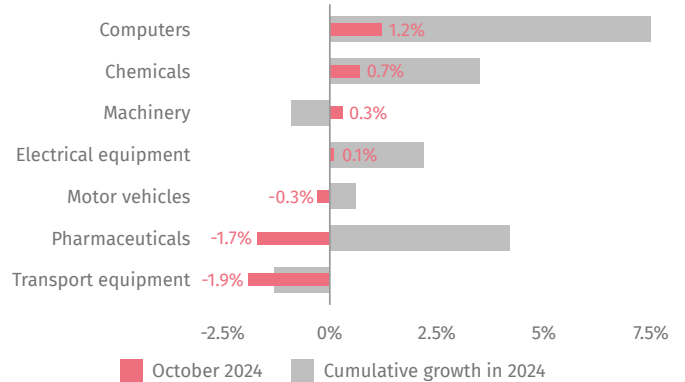

Sectoral trends

Global index of manufacturing production by technology level

Monthly and cumulative growth rates for higher-tech industries

Both industry groups exhibited subdued results in October 2024, but **medium-high and high tech industries** demonstrated consistent growth throughout the year.

Higher-tech industries continued their volatile path. While **computers** achieved growth exceeding 1%, **pharmaceuticals** and **other transport equipment** saw significant output reductions.

Note: This report is based on seasonally-adjusted series of official indices of industrial production (IIPs). Data used to create the infographic can be downloaded in [this link](#) while the full [database of monthly IIPs](#) can be accessed through the [UNIDO Statistics Portal](#). Methodological information can be found in [this document](#). For additional details, contact [UNIDO Statistics](#).
